

# Textiles & Furnishings

Product Guide

# the company

Scott Bader was established in 1921 and today we are a multinational chemical company employing 600 people worldwide.

Our key activities are the development, manufacture, distribution and sales of synthetic resins and polymers into applications such as marine, land transport, adhesives, building and decoration, graphic arts, surface coatings and textiles.

Our high quality products are sold under established brand names such as Crystic, Fireguard, Crestomer, Texicryl, Texipol, Crestakyd and Crestacryl.

From our five manufacturing sites, located in the UK, France, Croatia, the Middle East and South Africa, we are in the position to manufacture and distribute both Composite and Speciality Polymer products on a global basis.

# Textiles & Furnishings

Scott Bader has had an established presence in the textile market for over 50 years.

Our main focus has been in the printing, finishing and coating sectors of the industry with the continued development of innovative solutions, to meet the trends and demands of the market place.

Our range includes PVA and acrylic based binders for both pigment printing and non woven applications, enabling a wide range of physical properties and effects to achieved.

When it comes to rheology modification and viscosity control we have extensive knowledge of thickeners in textile and dye printing.

Chromojet\* technology is one of the areas our inverse emulsion thickeners are being developed in conjunction with our customers requirements for carpet printing. Scott Bader has set the performance benchmark ever since.

	Polymer Typ	NVC%	Viscosity mP	五	MFFT °C	Jg °C
Self crosslinking, soft binder for pigment printing and non-wovens. Good wash resistance.	Acrylic	40	50	4.5	< 2	-16
Self crosslinking, medium handle binder for high loft non-wovens or stiffener for window blinds.	Acrylic	46	150	6.5	15	30
Self crosslinking hard binder for fabric stiffening applications.	Styrene / acrylic	46	200	7	15	33
Self crosslinking binder for textile coating, very soft handle and good wash resistance.	Acrylic	45	150	4.5	< 2	-25
Self crosslinking binder designed to impart a soft handle on coated fabrics.	Acrylic	45	100	4.8	<2	-15
Self crosslinking, medium soft handle for textile coating and non wovens.	Acrylic	45	205	4.5	<2	11
Self crosslinking binder with high solvent and dry clean resistance.	Styrene / acrylic	45	100	6	< 2	11
Self crosslinking binder for pigment printing, good wet scrub resistance and soft handle.	Styrene / acrylic	41	300	5.5	< 2	-9
Self crosslinking, soft handle binder for non woven and textile applications. Very high solvent resistance.	Acrylic	46	1250	5	< 0	-30
Self crosslinkling, firm handle binder for non woven and textile applications. Can be used in combination with Texicryl 13-290 to give fabrics of intermediate handle.	Acrylic	46	250	5	16	24
Self crosslinking binder for non wovens, soft handle with no tack.	PVA	45	75	4.7	< 2	-1
Self crosslinking binder for non wovens and wadding applications.	PVA	45	100	4.5	12	32
Self crosslinking, soft low flammability binder for pigment printing and back coating.	PVdC	55	100	4.5	< 2	-4
High viscosity stiffener used to modify the handle of fabrics.	PVA	50	4200	5	15	37
Stiffener for textile applications, also used with knitted fabrics.	PVA	48	275	5	15	31
Stiffener for woven and non-woven fabrics. Modifier for SBRs.	Polystyrene	50	70	9	N/A	105
Alkali soluble emulsion thickener for rheology and viscosity modification of textile compounds. Pseudoplastic flow characteristics.	Styrene / acrylic	30	25	3	0	57
Texicryl 13-309 Alkali soluble emulsion thickener for rheology and viscosity modification of textile compounds. More Newtonian in character compared to Texicryl 13-308.	Acrylic	35	50	3	10	42
				pH Usage Range		
High efficiency thickener for carpet backing compounds. Long flow character.	Inverse emulsion	N/A	5,000	5.5 - 9.0	N/A	N/A
Pigment printing thickener, good all round performance with universal pigment and binder compatibility.	Inverse emulsion	N/A	4,500	5.5 - 9.0	N/A	N/A
Polyacrylate thickener with short flow properties for use in textile compounding.	Inverse emulsion	N/A	5,000	5.5 - 9.0	N/A	N/A
High efficiency synthetic thickener, designed for printing with Chromojet* machinery.	Inverse emulsion	N/A	15,000	3.5 - 7.0	N/A	N/A
	Good wash resistance.  Self crosslinking, medium handle binder for high loft non-wovens or stiffener for window blinds.  Self crosslinking binder for textile coating, very soft handle and good wash resistance.  Self crosslinking binder designed to impart a soft handle on coated fabrics.  Self crosslinking, medium soft handle for textile coating and non wovens.  Self crosslinking binder with high solvent and dry clean resistance.  Self crosslinking binder for pigment printing, good wet scrub resistance and soft handle.  Self crosslinking, soft handle binder for non woven and textile applications. Very high solvent resistance.  Self crosslinking firm handle binder for non woven and textile applications. Can be used in combination with Texicryl 13-290 to give fabrics of intermediate handle.  Self crosslinking binder for non wovens, soft handle with no tack.  Self crosslinking binder for non wovens and wadding applications.  Self crosslinking binder for non wovens and wadding applications.  Self crosslinking soft low flammability binder for pigment printing and back coating.  High viscosity stiffener used to modify the handle of fabrics.  Stiffener for textile applications, also used with knitted fabrics.  Stiffener for textile applications, also used with knitted fabrics.  Stiffener for textile compounds. Pseudoplastic flow characteristics.  Alkali soluble emulsion thickener for rheology and viscosity modification of textile compounds. Pseudoplastic flow characteristics.  Alkali soluble emulsion thickener for rheology and viscosity modification of textile compounds. More Newtonian in character compared to Texicryl 13-308.  High efficiency thickener with short flow properties for use in textile compounding.  High efficiency synthetic thickener, designed for printing with	Self crosslinking, soft binder for pigment printing and non-wovens. Good wash resistance.  Self crosslinking, medium handle binder for high loft non-wovens or stiffener for window blinds.  Self crosslinking binder for textile coating, very soft handle and good wash resistance.  Self crosslinking binder for textile coating, very soft handle and good wash resistance.  Self crosslinking binder designed to impart a soft handle on coated fabrics.  Self crosslinking medium soft handle for textile coating and non wovens.  Self crosslinking binder with high solvent and dry clean resistance.  Self crosslinking binder for pigment printing, good wet scrub resistance and soft handle.  Self crosslinking soft handle binder for non woven and textile applications. Very high solvent resistance.  Self crosslinking, ifirm handle binder for non woven and textile applications. Very high solvent resistance.  Self crosslinking firm handle binder for non woven and textile applications. Can be used in combination with Texicryl 13-290 to give fabrics of intermediate handle.  Self crosslinking binder for non wovens, soft handle with no tack.  PVA  Self crosslinking binder for non wovens and wadding applications.  PVA  Self crosslinking soft low flammability binder for pigment printing and back coating.  High viscosity stiffener used to modify the handle of fabrics.  PVA  Stiffener for textile applications, also used with knitted fabrics.  PVA  Stiffener for woven and non-woven fabrics. Modifier for SBRs.  Polystyrene  Alkali soluble emulsion thickener for rheology and viscosity modification of textile compounds. Pseudoplastic flow character:  Alkali soluble emulsion thickener for reapet backing compounds.  Long flow character.  Pigment printing thickener, good all round performance with universal pigment and binder compatibility.  Polyacrylate thickener with short flow properties for use in textile compounding.  High efficiency synthetic thickener, designed for printing with	Self crosslinking, soft binder for pigment printing and non-wovens. Good wesh resistance.  Self crosslinking, medium handle binder for high loft non-wovens or stiffener for window blinds.  Self crosslinking hard binder for fabric stiffening applications.  Self crosslinking binder for textile coating, very soft handle and good wash resistance.  Self crosslinking binder designed to impart a soft handle and good wash resistance.  Self crosslinking, medium soft handle for textile coating Acrylic 45 and non wovens.  Self crosslinking, medium soft handle for textile coating Acrylic 45 and non wovens.  Self crosslinking binder with high solvent and dry clean resistance.  Styrene / acrylic 45 Self crosslinking binder for pigment printing, good wet scrub resistance and soft handle.  Self crosslinking soft handle binder for non woven and textile applications. Soft handle binder for non woven and textile applications. Can be used in combination with Texicryl 13-290 to give fabrics of intermediate handle.  Self crosslinking binder for non wovens soft handle with no tack.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 45  Self crosslinking binder for non wovens and wadding applications.  PVA 50  Silfener for textile applications, also used with knitted fabrics.  PVA 50  Silfener for textile applications, also used with knitted fabrics.  PVA 50  Silfener for textile compounds. Nore Newtonian in character compared to Textile compounds. Nore Newtonian in character.  Pigment print	Self crosslinking, soft binder for pigment printing and non-wovers.  Self crosslinking, medium handle binder for high loft non-wovers Acrylic 46 150 or stiffener for window blinds.  Self crosslinking hard binder for fabric stiffening applications.  Self crosslinking hard binder for fabric stiffening applications.  Self crosslinking binder for textile coeting, very soft handle and good wash resistance.  Self crosslinking binder for textile coeting, very soft handle and good wash resistance.  Self crosslinking binder designed to impart a soft handle and good wash resistance.  Self crosslinking, medium soft handle for textile coeting Acrylic 45 100 on coeted fabrics.  Self crosslinking, medium soft handle for textile coeting Acrylic 45 100 on wovers.  Self crosslinking binder for pigment printing, good wet scrub Self-crosslinking binder for pigment printing, good wet scrub resistance and soft handle.  Self crosslinking binder for pigment printing, good wet scrub Self-crosslinking, soft handle binder for non woven and textile applications. Very high solvent resistance.  Self crosslinking, firm handle binder for non woven and textile applications. Sen be used in combination with Texicryl 13-290 to give fabrics of intermediate handle.  Self crosslinking binder for non wovens and wadding applications.  Self crosslinking binder for non wovens and wadding applications.  PVA 45 75  Self crosslinking binder for non wovens and wadding applications.  PVA 45 100  High viscosity stiffener used to modify the handle of fabrics.  PVA 50 4200  Stiffener for textile applications, also used with knitted fabrics.  PVA 50 4200  Alkali soluble emulsion thickener for rheology and viscosity modification of textile compounds. Nore Newtonian in character compared to Textryl 13-308.  High efficiency thickener, good all round performance with universel pigment and binder compatibility.  Polyacrylate thickener with short flow properties for use in textile compounding.  High efficiency synthetic thickener, designed for printing with Inverse e	Self crosslinking, soft binder for pigment printing and non-vovens.  Self crosslinking, medium handle binder for high loft non-vovens or stiffered from vindovo blinds.  Self crosslinking hand binder for fabric stiffening applications.  Self crosslinking binder for fabric stiffening applications.  Self crosslinking binder for fabric stiffening applications.  Self crosslinking binder for textile coating, very soft handle and good wish resistance.  Self crosslinking binder designed to impart a soft handle and Acrylic 45 150 4.8  Self crosslinking medium soft handle for textile coating Acrylic 45 100 4.8  on coated fabrics.  Self crosslinking medium soft handle for textile coating Acrylic 45 100 6.  Self crosslinking medium soft handle for textile coating Acrylic 45 100 6.  Self crosslinking binder with high solvent and dry clean resistance.  Syvene / acrylic 45 100 6.  Self crosslinking binder for pigment printing, good wet scrub Syvene / acrylic 45 100 6.  Self crosslinking soft handle binder for non woven and textile applications. Very high solvent resistance.  Self crosslinking in mandle binder for non woven and textile applications. Cen be used in combination with Texticy 13-290 to give fabrics of intermediate handle.  Self crosslinking binder for non wovens and vadding applications.  PVA 45 75 4.7  Self crosslinking binder for non wovens and vadding applications.  PVA 45 100 4.5  Self crosslinking binder for non wovens and vadding applications.  PVA 48 275 5  Stiffener for textile applications, also used with knitted fabrics.  PVA 48 275 5  Stiffener for textile applications, also used with knitted fabrics.  PVA 50 4200 5  Stiffener for textile applications, also used with knitted fabrics.  PVA 50 4200 5  Stiffener for textile applications, also used with knitted fabrics.  PVA 50 450 5  Stiffener for textile applications, also used with knitted fabrics.  PVA 50 450 5  Stiffener for textile applications, also used with knitted fabrics.  PVA 50 450 5  Stiffener for textile applications, also used with knitted f	Self crosslinking, soft binder for pigment printing and non-wovens.  Cond wish resistance.  Self crosslinking medium handle binder for high loft non-wovens or sittlener to revision window blinds.  Self crosslinking hand binder for totale craiting, very soft handle and good wash resistance.  Self crosslinking binder for totale craiting, very soft handle and Acrylic.  Self crosslinking binder designed to impart a soft handle Acrylic.  Self crosslinking binder designed to impart a soft handle Acrylic.  Self crosslinking binder designed to impart a soft handle Acrylic.  Self crosslinking medium soft handle for textile coating Acrylic.  Self crosslinking binder with high solvent and dry clean resistance.  Self crosslinking binder with high solvent and dry clean resistance.  Self crosslinking binder for pigment printing, good wet scrub resistance and out handle.  Self crosslinking binder for pigment printing, good wet scrub resistance and out handle for textile coating applications. Very high solvent resistance.  Self crosslinking binder for pigment printing, good wet scrub self-crosslinking, binder for pigment printing, good wet scrub resistance and out handle binder for non woven and textile applications. Can be used in combination with flexicyl 13-290 to give florits of intermediate handle.  Self crosslinking firm handle binder for non woven and textile applications. Can be used in combination with flexicyl 13-290 to give florits of intermediate handle.  Self crosslinking binder for non wovens, soft handle with no tack.  PVA 45 75 4.7 <2  Self crosslinking binder for non wovens and wedding applications.  PVA 45 100 4.5 12  Self crosslinking binder for non wovens and wedding applications.  PVA 48 275 5 10  Albal soluble emulsion thickner for theology and viscosity modification of bestele compounds. Nor Newtonian in character compared to Texicity 13-300.  Albal soluble emulsion thickner for theology and viscosity modification of textile compounds. Nore Newtonian in character compared to Texicity 13-300.  Plagment pr

Values given are an indication of characteristics and should not be taken as a supply specification. This is the standard product range for the Textile and Furnishings market. It is representative of the wide selection of products Scott Bader can offer.

All information is given in good faith but without warranty. We cannot accept responsibility or liability for any damage, loss or patent infringement resulting from the use of this information.

As a speciality manufacture we will also discuss tailoring products to meet your specific application needs.
